

# OEM Grade - Aftermarket Replacement PV Modules.

Suntech- Schott - Shell Solar - BP Solar - Sharp - Solarworld & More

## As PV Systems age

Some percentage of solar panels will need repair or replacement. We have the solution. ITC Solar specializes in exact replacement solar panels for any model discontinued by the original manufacturers. Our aftermarket solar panels directly replace discontinued OEM solar panels. We stock many models and have a reasonable MOQ for panels we do not stock.

## Quality Technology

Our aftermarket solar panels incorporate state-of-the-art crystalline technology with a silicon nitride (SiN) coating to enhance cell efficiency. The modules are fabricated to exceed the original manufacturers standards. All our aftermarket solar panels are certified to the UL1703 standard.
